**COMMERCE RESOURCES CORP.**  
**NOTES TO THE FINANCIAL STATEMENTS**  
January 31, 2007 and October 31, 2006

Note 1     Nature of Operations

Commerce Resources Corp. (the “Company”) is a public company listed on the TSX Venture Exchange in Canada and on the Frankfurt Stock Exchange in Germany. The Company was incorporated on May 19, 1999 under the Company Act of British Columbia and is in the business of acquiring, exploring, developing and evaluating mineral resource properties, and either joint venturing or developing these properties further or disposing of them when the evaluation is completed. At January 31, 2007, the Company was in the exploration stage and had interests in properties located in British Columbia.

The recoverability of amounts shown for resource properties is dependent upon the discovery of economically recoverable reserves, continuation of the Company’s interest in the underlying mineral claims, the ability of the Company to obtain financing to complete their development, and future profitable production or disposition thereof.

Note 2     Summary of Significant Accounting Policies

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in Canada. Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of financial statements for a period necessarily involves the use of estimates which have been made using careful judgement. Actual results could vary from these estimates.

The financial statements have in management’s opinion, been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below:

a) Cash and Equivalents

Cash and cash equivalents consist of all highly liquid investments that are readily convertible to cash and have maturities of three months or less when purchased.

b) Marketable Securities

Marketable securities are carried at the lower of cost and market value.

c) Resource Properties

The Company defers the cost of acquiring, maintaining its interest, exploring and developing mineral properties until such time as the properties are placed into production, abandoned, sold or considered to be impaired in value. Costs of producing properties will be amortized on a unit of production basis and costs of abandoned properties are written-off. Proceeds received on the sale of interests in mineral properties are credited to the carrying value of the mineral properties, with any excess included in operations. Write-downs due to impairment in value are charged to operations.

Note 2 Summary of Significant Accounting Policies – (cont'd)

c) Resource Properties – (cont'd)

The Company is in the process of exploring and developing its mineral properties and has not yet determined the amount of reserves available. Management reviews the carrying value of mineral properties on a periodic basis and will recognize impairment in value based upon current exploration results, the prospect of further work being carried out by the Company, the assessment of future probability of profitable revenues from the property or from the sale of the property. Amounts shown for properties represent costs incurred net of write-downs and recoveries, and are not intended to represent present or future values.

d) Equipment

Equipment is recorded at cost and amortized over their useful lives using the declining balance method using the following annual rates:

Furniture and equipment	20%
Computer equipment	30%

Additions during the year are amortized at one-half the annual rates.

e) Basic and Diluted Loss Per Share

Basic loss per share is computed by dividing the loss for the year by the weighted average number of common shares outstanding during the year. Diluted earnings per share reflect the potential dilution that could occur if potentially dilutive securities are exercised or converted to common stock. The dilutive effect of options and warrants and their equivalent is computed by application of the treasury stock method and the effect of convertible securities if the “if converted” method. Fully dilutive amounts are not presented when the effect of the computations are anti-dilutive due to the losses incurred. Accordingly, there is no difference in the amounts presented for basic and diluted loss per share.

f) Fair Market Value of Financial Instruments

The carrying value of the Company’s financial instruments, consisting of cash and cash equivalents, marketable securities, amounts receivable, share subscriptions receivable and accounts payable approximate their fair values due to the short maturity of such instruments. The fair market value of amounts due from related parties is also assumed to approximate their carrying amount. Unless otherwise noted, it is management’s opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

Note 2 Summary of Significant Accounting Policies – (cont'd)

g) Income Taxes

The Company uses the asset and liability method of accounting for income taxes. Under this method, current income taxes are recognized for the estimated income taxes payable for the current period. Future income tax assets and liabilities are recognized for temporary differences between the tax and accounting basis of assets and liabilities as well as for the benefit of losses available to be carried forward to future years for tax purposes only if it is more likely-than-not that they can be realized.

h) Asset Retirement Obligations

The fair value of obligations associated with the retirement of tangible long-lived assets is recorded in the period the asset is put into use, with a corresponding increase to the carrying amount of the related asset. The obligations recognized are statutory, contractual or legal obligations. The liability is accreted over time for changes in the fair value of the liability through charges to accretion, which is included in depletion, depreciation and accretion expense. The costs capitalized to the related assets are amortized in a manner consistent with the depletion and depreciation of the related asset. At October 31, 2006, the Company cannot reasonably estimate the fair value of the resource properties' site restoration costs, if any.

i) Mining Tax Credits

Mining tax credits are recorded in the accounts when there is reasonable assurance that the Company has complied with, and will continue to comply with, all conditions needed to obtain the credits. These non-repayable mining tax credits are earned in respect to exploration costs incurred in British Columbia, Canada and are recorded as a reduction of the related deferred exploration expenditures.

j) Foreign Currency Translation

Monetary assets and liabilities denominated in a foreign currency are translated into Canadian dollars at exchange rates prevailing at the balance sheet date and non-monetary assets and liabilities are translated at exchange rates prevailing at the transaction dates. Foreign currency denominated revenues and expenses are translated at exchange rates prevailing at the transaction dates. Gains or losses arising from the translations are recognized in the current year.

The fair value of all share purchase options granted is expensed over their vesting period with a corresponding increase to contributed surplus. Upon exercise of share purchase options, the consideration paid by the option holder, together with the amount previously recognized in contributed surplus, is recorded as an increase to share capital.

Note 2 Summary of Significant Accounting Policies – (cont'd)

k) Stock-based Compensation

The Company uses the Black-Scholes option valuation model to calculate the fair value of share purchase options at the date of grant. Option pricing models require the input of highly subjective assumptions, including the expected price volatility. Changes in these assumptions can materially affect the fair value estimate and, therefore, the existing models do not necessarily provide a reliable single measure of the fair value of the Company's share purchase options.

l) Flow-through Shares

Under the terms of flow-through share agreements, the related expenditures are renounced to the subscribers of such shares. In March 2004, the CICA issued Emerging Issue Committee Abstract No. 146, Flow-through Shares, which clarifies the recognition of previously unrecorded future income tax assets caused by renouncement of expenditures relating to flow-through shares. For flow-through shares issued after March 19, 2004, the Company records the tax effect related to the renounced deductions as a reduction of income tax expense in the statement of operations on the date that the Company renounces the deductions for investors.

Note 3 Equipment

	2007			2006
	<u>Cost</u>	<u>Accumulated Amortization</u>	<u>Net</u>	<u>Net</u>
Computer equipment	\$ -	\$ -	\$ -	\$ -
Furniture and equipment	-	-	-	-
	\$ -	\$ -	\$ -	\$ -

During the year ended October 31, 2006, the Company disposed of all equipment to a company with a common director for proceeds of \$3,150, the estimated fair value.

Note 4 Resource Properties

Au/WEN Property

The Company had a 100% interest (subject to a 2% net smelter return royalty) in certain mineral claims located in the Nicola Mining Division of British Columbia known as the Au Property. During the year ended October 31, 2005, the Company granted an option to another non-related public company, Victory Resources Corp. ("Victory"), to earn up to a 70% interest in the Au property. Consideration for an initial 50% interest in the property is as follows:

Note 4     Resource Properties – (cont'd)

Au/WEN Property – (cont'd)

- a) Cash payments of \$20,000:
  - \$10,000 upon execution of the agreement (received);
  - \$10,000 on or before March 1, 2006 (received);
- b) Issue 200,000 common shares:
  - 100,000 shares upon regulatory approval (received);
  - 100,000 shares on or before March 1, 2006 (received);
- c) Incur \$250,000 in exploration and development expenditures on the property on or before March 1, 2007

The additional 20% interest in the property will be earned by paying to the Company, on or before the third anniversary of the agreement, additional consideration of \$10,000 cash and 50,000 common shares.

In November 2005, the Company acquired an option to earn a 100% interest in three mineral claims adjacent to the Au Property. Consideration is one-half of the amounts received from Victory, payable as follows:

- a) \$5,000 on the first cash payment received from Victory (paid);
- b) 50,000 common shares of Victory on the first issuance of common shares of Victory received by the Company (delivered);
- c) \$5,000 on the second cash payment received from Victory (paid);
- d) 50,000 common shares of Victory on the second issuance of common shares from Victory when received by the Company (delivered);

Should Victory exercise its option to acquire the additional 20% interest in the property and provide the additional consideration to the Company, the Company will provide the optionor with an additional \$5,000 and 25,000 common shares of Victory (subsequently paid).

Subsequent to October 31, 2006, the Company received notice from Victory that the required \$250,000 in exploration expenditures had been made on the property, and therefore, Victory had earned the initial 50% interest. The original agreement was then amended such that Victory acquired the remaining 50% interest by paying the Company \$10,000 and issuing 100,000 common shares (subsequently received).

Note 4     Resource Properties – (cont'd)

Verity and Fir Claims

The Company has a 100% interest in its Verity and Fir claims, located in the Blue River region of the Kamloops Mining District of British Columbia, which were previously acquired by staking.

Other Claims

a) Cable Creek

During the year ended October 31, 2004, the Company acquired an option to earn a 100% interest in certain mineral claims located in the Skeena Mining District of British Columbia known as the Cable Creek project. Consideration payable was \$5,000 upon signing and incurring exploration expenditures of \$250,000 including \$5,000 annual payments beginning in February 2005. Prior to incurring any exploration expenditures, the Company assigned the option agreement to another non-related public company (the "Assignee") for \$20,000 and 120,000 shares of the other public company.

During the year ended October 31, 2005, the Assignee incurred total exploration expenditures of \$77,578 on the property before deciding to abandon the project. The Company decided to continue with the original option agreement and made the required annual payments of \$5,000 due for 2005 and 2006.

b) Mud Lake

During the year ended October 31, 2005, the Company acquired a 100% interest in six mineral claims located in the Blue River region of the Kamloops Mining District of British Columbia for total consideration of \$13,205. One of the claims has since been allowed to lapse.

c) Carbo claims

During the year ended October 31, 2005, the Company acquired three mineral claims (Carbo 1, 2 and 3) located in British Columbia by incurring staking costs of \$1,062.
